# GORE GOMDEGENEES

#### U.S. Government Chief Financial Officers Council

The members of the U.S. Government Chief Financial Officers (CFO) Council—the CFOs and Deputy CFOs of all the 24 largest Federal agencies and senior officials of the Office of Management and Budget and the Department of the Treasury—work collaboratively to improve financial management in the U.S. Government. The CFO Council has become a strong force for active cooperation among agencies dealing with common problems. Its composition of both political appointees and senior career civil servants ensures collaboration and continuity of effort.

Under the Chief Financial Officers Act of 1990, the CFO Council was established to advise and coordinate the activities of the agencies of its members on such matters as consolidation and modernization of financial systems, improved quality of financial information, financial data and information standards, internal controls, legislation affecting financial operations and organizations, and other financial management matters.

The CFO Act legislated broad authority for each CFO to oversee all financial management activities relating to the programs and operations of the agency. With this authority, the CFO will ensure that sound financial management practices are applied in all organizational components of his or her agency and that modern automated financial systems and tools are used. Specific CFO authority varies agency by agency, but may include some or all of the following financial and general management components: budget formulation and execution, facilities or property management, financial operations and analysis, financial systems, grants management, information resources management, personnel, and procurement. Information of the CFO Council can be found at its website: www.financenet.gov/financenet/fed/cfo/cfo.htm

## The Joint Financial Management Improvement Program

The JFMIP is a joint and cooperative undertaking of the U.S. Department of the Treasury, the General Accounting Office, the Office of Management and Budget, and the Office of Personnel Management working in cooperation with each other and other agencies to improve financial management practices in government. The Program was given statutory authorization in the Budget and Accounting Procedures Act of 1950 (31 USC 65). Leadership and program guidance are provided by the four Principals of the JFMIP—Comptroller General of the United States, Secretary of the Treasury, and the Directors of the Office of Management and Budget, and the Office of Personnel Management. Each Principal designates a representative to serve on the JFMIP Steering Committee, which is responsible for the general direction of the Program. The JFMIP Executive Director, and a program agency representative (who serves for 2 years) are also on the Steering Committee.

The Program promotes strategies and guides financial management improvement across government; reviews and coordinates central agencies activities and policy promulgations; and acts as catalyst and clearinghouse for sharing and disseminating information about good financial management practices. This information sharing is done through conferences and other educational events, newsletters, meetings with interagency groups and agency personnel, and through FinanceNet, an electronic clearinghouse on the Internet.

The JFMIP has worked on interagency projects that developed a financial systems framework and financial systems requirements. For the future JFMIP plans to assist Federal agencies in improving their financial systems through its Program Management Office. The Office will work on revising the Federal government's requirements definition, testing, and acquisition processes; the first target of opportunity is core financial systems. The objectives of the Office are to develop systems requirements, communicate and explain Federal and agency needs, provide agencies and vendors information to improve financial systems, ensure that products meet relevant system requirements, and simplify the procurement process.

Information on JFMIP can be found at its website: www.financenet.gov/financenet/fed/jfmip/jfmip.htm or call 202/512-9201.

## **Foreword**

The Human Resources Committee (HRC) of the U.S. Chief Financial Officers (CFO) Council and the Joint Financial Management Improvement Program (JFMIP) have undertaken efforts to improve the recruitment, training, retention, and performance of Federal financial management personnel. Since 1995, their efforts have centered on publishing a well-defined set of technical core competencies for financial management personnel. The core competencies series of documents articulate the appropriate knowledge, skills, and abilities necessary for financial personnel to succeed in their respective careers.

tang menghalangan tanggan ada menghalangan beranggan penghanggan penghanggan penghanggan penghanggan penghangga

i not escenti marka**no (176**1 las espéciel en d

Recognizing the accelerating rate of change in Federal financial management, in 1998, the HRC and JFMIP established a Core Competency Review Board to ensure the currency of these documents. The first project was to review the first document in the series, *Framework for Core Competencies for Financial Management Personnel in the Federal Government*, published in November of 1995. That publication addressed competencies for accountants, budget analysts and financial managers. Revisions for each occupational series will now be issued separately.

This document, Core Competencies for Budget Analysts in the Federal Government, identifies and sorts the competencies necessary for budget analysts' work into the following categories: Budgeting Concepts and Processes, Budget Presentation and Justification, and General. Pursuit of these competencies will enable budget analysts to meet the challenges of today's changing environment and prepare for the future.

Budget professionals also need to develop leadership competencies, which are the personal and professional attributes critical to successful performance in many occupations. The U.S. Office of Personnel Management (OPM) has issued the *Leadership Effectiveness Framework (LEF)*, which defines 27 competencies that are important for effective performance at all leadership levels within the Federal government. OPM also identified five fundamental executive qualifications. These are posted on OPM's website: http://www.opm.gov/ses/html/ecq4.htm.

In 1998, the CFO Council approved the Statement of Principles for Federal Financial Education and Training (Appendix A). This document should be used in conjunction with the other core competencies documents (Appendix B). All of the core competencies documents, which are also posted on the FinanceNet website <a href="http://www.financenet.gov">http://www.financenet.gov</a>, will promote a better understanding of human resources development in the Federal government.

We would like to thank and acknowledge the major contributors who updated this document (Appendix D). We are working toward a policy to promote the professionalism of this occupational series by working with the Office of Personnel Management, and developing a CFO Council policy on professional certification. If you have any comments or changes to this document, please contact the CFO Council HRC or JFMIP.

## Introduction

The decision to develop core competencies for Federal financial personnel was made in 1994 at a government-wide Financial Education and Training Symposium sponsored by the Chief Financial Officers (CFO) Council and the Joint Financial Management Improvement Program (JFMIP). The goal of that Symposium was to identify priorities and develop strategies for the professional development of the Federal financial workforce. At the time, Federal financial management was facing unprecedented and significant changes demanded by the convergence of new legislation (CFO Act of 1990, The Government Management Reform Act of 1994, and the Government Performance and Results Act of 1993), an increasing rate of accounting standards issuances, and evolving business practices. Attendees agreed that the first priority would be to identify the core competencies for financial management personnel. This would serve as a base to help CFOs recruit and develop a highly qualified financial workforce with the knowledge and skills needed to succeed in the 21st century.

The core competencies for financial management disciplines were completed in 1998. A full range of Financial Core Competencies documents has been published. These are:

Core Competencies for Accountants in the Federal Government

Core Competencies for Budget Analysts in the Federal Government

Core Competencies for Financial Managers in the Federal Government

Core Competencies in Financial Management for Program Managers in the Federal Government.

Core Competencies in Financial Management for Information Technology Personnel
Implementing Financial Systems in the Federal Government;

Core Competencies for Financial Systems Analysts in the Federal Government; and

Core Competencies in Financial Management for Management Analysts and Financial Specialists.

#### **Reasons for Revision**

Since 1995, when the first work was published, changes to financial management have continued to evolve. Subsequent legislation, new FASAB (Federal Accounting Standards Advisory Board) standards, and changes in the workplace at large, drive document revisions to ensure that the documents continue to serve as valued reference guides for the financial community. A Core Competencies Review Board was established by the JFMIP and the Human Resources Committee of the Chief Financial Officers Council in 1998. This Board ensures that the core competencies body of work does not become dated.

Core Competencies for Budget Analysts in the Federal Government has been revised by an interagency team of budget professionals to include the following changes in emphasis:

- -- Analytic skills. Crunching the numbers will always be important for budget analysts, but understanding what the numbers mean is much more critical for effective performance. The ability to discern relationships between budget numbers and performance results is increasingly important.
- -- Knowing the business. Just as one cannot be an effective budget analyst without knowing the Congressional budget/appropriations process or accounting fundamentals, today's budget analysts must also be aware of and understand the functional programs of their agencies. Justifying budget needs and relating resources to performance results requires program knowledge.

#### Core Competencies for Budget Analysts in the Federal Government

- Using new tools. Technology changes and innovations are constantly providing new tools. Analysts must be able to select those that are most appropriate and then learn to use them with expertise.

The core competencies needed to perform the duties of Federal Budget Analysts are divided into three distinct levels. These levels are:

Level 1 Entry level: learning and applying fundamental policies and procedures, and performing routine activities.

This stage can entail 1 to 3 years of developmental experience.

Level 2 Journeyman level: applying proficiencies as a fully functional and experienced analyst. At this level, a budget analyst begins to make sound recommendations to resolve complex budget issues and is capable of integrating a successful multi-disciplinary approach to problem solving.

Level 3 Senior level: normally a team leader or first level supervisor. At this level the budget analyst makes sound judgements and recommendations, and coordinates and directs others to address budget issues competently.

The competencies, also commonly referred to as knowledge, skills and abilities (KSAs), are listed in the first column of the following matrix. In the center of the matrix, the column entitled "Learning Objectives" describes the performance activities that demonstrate successful achievement of the respective competency. The final column lists examples of developmental activities and education/training one might pursue to gain the competencies. These activities include on-the-job training and formal training courses.

The Contractions are properly and the contraction of the contraction of the

#### **How to Use this Document**

This document is a guide to help budget analysts and managers when engaged in workforce planning, career development, and other human resource functions. It should stimulate discussion between management and staff regarding professional goals and expectations, and the appropriate training choices and assignments to reach those goals. The individual and the manager should use this guide when developing an individual development plan (IDP) for the employee. A sample IDP can be found in Appendix E. We also encourage the human resources community to use this guide, as well as the other guides in the series, when servicing their financial management/budget constituencies.

Employees need to be aware that they have a responsibility for building, maintaining and refining these core competencies in order to effectively execute their duties, meet the demands of emerging requirements, and prepare for career advancement. While this document provides advice to help budget analysts become more effective, it does not guarantee promotion or qualification for specific positions.

#### **Training Resources**

Agencies, educational institutions, and commercial training providers offer a range of courses to help employees attain the competencies described in this document. Classroom instruction is generally essential to learning the basic concepts, principles and policies of all the financial management disciplines. The knowledge gained must also be reinforced with practical applications in the workplace. And since no discipline is static, learning must be a continuous exercise, both in and out of the classroom setting.

An excellent resource for budget analysts to find education and training suited to their specific needs is through the Internet. The FinanceNet address--http://www.financenet.gov/--provides access to the web pages that contain many of the course catalogs and training materials from both private and public sector organizations in the education and training business.

Budget analysts, as all workers, will also benefit from management training in leadership, quality management, team management and oral and written communications.

#### **Conclusions and Recommendations**

The Human Resources Committee of the CFO Council, JFMIP, and other financial management leaders throughout government have recommended and supported the development of the core competency documents. The Review Boards were established to ensure the currency and accuracy of these documents. For core competencies to be most effective, financial managers and other leaders need to fully support and promote their use within their organizations. Agencies are encouraged to share their best practices in education and training with other departments and with JFMIP for posting on FinanceNet to realize maximum benefit to the government.

## **Appendix A**

Chief Financial Officers Council
Statement of Principles for Federal Financial Education and Training

The Federal financial management community must make substantial investments in professional development of its workforce in order to successfully meet requirements for financial services and integrity. Well-designed and delivered education and training programs are critical to developing and maintaining the required level of technical, professional and managerial expertise for Federal financial management.

The following principles apply to planning and evaluating education and training programs for federal financial management.

#### **Quality and Accreditation**

Education and training providers should meet the standards for accreditation or certification that are appropriate for their course offerings. Providers should have an on-going process to assess and enhance the relevancy, currency and technical soundness of course content. These assessments should draw from customer as well as internal evaluations. Instructors should be evaluated for their effectiveness in communicating course content.

#### **Core Competency Profiles**

Education and training courses should demonstrate, in an affirmative manner, that each course is consistent with the core competency profiles for financial management occupations that have been identified by the CFO Council and published in partnership with the JFMIP. Where appropriate, practical application of course material to the Federal financial management environment should be emphasized.

#### **Delivery**

Education and training providers should provide flexible, effective alternative methods of course delivery, including on-site classroom, distance learning, self-study, etc., in order to meet the diverse needs of agencies and students.
